41. Everything was going very well until they came up against an unexpected problem. (7.p)
(77.p)
42. The most important technological invention is the computer which has transformed the way people communicate with each other. Today, many companies are run by computers. Employees use computers daily in their offices to make work go faster. When some employees use work computers for personal purposes, work will be badly affected and it won't be finished on time. I think companies shouldn't allow their employees to use work computers for their own purposes to make them do their jobs properly.
