A king wanted his kingdom to be famous for making new scientific <u>discoveries</u> . So he sent his servants out to faraway towns and cities to look for the best scientist possible. They found the most respected scientists in the kingdom — each one an <u>expert</u> . The king welcomed them to his palace. He said, 'As you know I am looking for a top scientist. I want him to make exciting new discoveries that will change the world. So he must be imaginative, decisive and courageous.' Then the king pointed to an enormous door in the wall behind him which the scientists hadn't noticed. 'This door is the biggest and heaviest door in my kingdom. You must open it without any help.' The scientists looked at the door in horror. How could a single man open such an <u>enormous</u> door? It must be as heavy as a hundred men!	A train going from London to Manchester suddenly stopped. The passengers were wondering why the train wasn't moving. They were shocked when they heard the train driver's voice, 'We've got a broken windscreen wiper. Can anyone help to fix it?' Four men got up and went to help. One of them said: 'I couldn't believe what was happening. When I got to the front of the train, I saw a man standing with one foot on the platform. He was stretching across the window, holding up the broken windscreen wiper. I was even more surprised when he told me he was a passenger, too!' The men tried to repair the broken windscreen wiper, but in the end, they gave up, and everyone got off the train, and took a different one to Manchester.
